Payal Priyadarshini Panda

City-Bengaluru, Karnataka,560029, Phone: +91-9337740930 — Email: pandapayalp@gmail.com — LinkedIn: linkedin.com/in/payal-priyadarshini-panda Github: github.com/Payal-hub2004

Professional Summary

M.Sc. Statistics student with hands-on experience in data analytics, statistical modelling, and machine learning. Skilled in Python, SQL, and Power BI, with experience in data preprocessing, exploratory analysis, customer segmentation, and translating complex data into actionable insights. Strong analytical and problem-solving abilities with an interest in product analytics, user behaviour, and data-driven business decisions.

Education

M.Sc. Statistics and Data Science **2025–2027**
Christ University, Bengaluru Central Campus, Karnataka

B.A. (Hons.) Statistics (CGPA: 8.74) **2022–2025**
BJB Autonomous College, Utkal University, Bhubaneswar, Odisha

Work Experience

Research Intern **Apr 2026 – Aug 2026**
Indian Statistical Institute, Bengaluru

- Developed a Python-based air quality index (AQI) anomaly-detection framework using Relevance Vector Machines (RVM), log-odds transformation, and EWMA control charts.
- Conducted Average Run Length (ARL) analysis across different smoothing parameters to assess monitoring performance.

Data Science Intern **Jan 2026 – Feb 2026**
IDEAS-TIH Indian Statistical Institute, Kolkata

- Applied Python-based data preprocessing, dimensionality reduction, and clustering in an unsupervised learning project.
- Investigated data patterns and interpreted analytical results to communicate meaningful findings. Used statistical and machine learning techniques to support structured data analysis.

Project Coordinator **Mar 2025 – Sep 2025**
JKB Consulting Services (Remote) *Tools: Excel, SQL, Power BI*

- Coordinated project planning, execution, and delivery while aligning client requirements with project deliverables.
- Streamlined reporting workflows using Excel lookup functions and pivot tables.
- Built Power BI dashboards to analyse revenue trends, customer segments, and business performance metrics.
- Managed stakeholder communication and project updates to support timely execution and delivery.

Projects

Brain Tumor Detection Using MRI Images | *Python, TensorFlow, CNN, Grad-CAM* **Aug 2026– Sep 2026**

- Developed CNN models to classify four brain tumor categories using 7,200 MRI images.
- Compared EfficientNetB0 and DenseNet121, achieving 81.63% test accuracy.
- Implemented Grad-CAM explainability and deployed an interactive Gradio application.

WEATHER: Weather Events & Anomaly Tracker Hub | *Python, Power BI* **Aug 2025 – Sep 2025**

- Analysed weather data to identify trends, anomalies, and potential climate-related risks.
- Built Power BI dashboards to communicate seasonal patterns and support data-driven insights.
- Presented findings through a video presentation.

Skills

Analytics: Python, SQL, Pandas, NumPy, R, EDA, Data Preprocessing, Statistical Modelling, Hypothesis Testing, Regression, Clustering, Dimensionality Reduction, Anomaly Detection, Model Evaluation
Product and Business: Customer Segmentation, Revenue and Business Performance analysis, KPI reporting, Dashboard, Insight Communication, Stakeholder Coordination
Tools: Advanced Excel, Pivot Tables, Lookup Functions, Power BI, Tableau, Dashboard Development

Certifications

Career Essentials in Data Analysis – Microsoft & LinkedIn (2024)
Deloitte Data Analytics Job Simulation (2025)
Python for Data Science AI and Development – IBM (2025)
Cloud Computing from Concept to Deployment – Christ University (2026)
